Summary

I'm a Cloud Support Engineer at Amazon Web Services (AWS), specializing in networking and compute services, from VPC to EC2, helping customers design, troubleshoot, and operate cloud-native workloads at scale.

I'm passionate about software engineering across the stack, from data structures and networking to distributed systems, cloud infrastructure, and AI. I'm an active open source contributor to CNCF projects such as Kubernetes and Argo, as well as community driven projects like Yorkie, and I enjoy sharing knowledge through contributing, technical writing, and mentoring.

Experience

Amazon Web Services Korea LLC.

Seoul, S.Korea

CLOUD SUPPORT ENGINEER

July. 2024 -

- Provided technical support to customers, specializing in AWS networking services.
- Provide advanced technical support for escalations as a subject matter expert for Elastic Load Balancing and CloudWatch.
